Project Title
Team Members

Project Description
Describe the high level aspects of the project (No technical sides).

Project Material
List all the components and software you plan on using

Project Block Diagram
Show the diagram and how all blocks are connected together

Project State Diagram
Show the states of your project and how to transition from one state to another (Finite State Machine)

Machine Learning Model
Describe your machine learning model and what features you plan to extract

Project Phases
Divide the project into two or three phases, where the first phase is the simplest base implementation and later phases are more sophisticated upgrades.

Roles:
Show what each member of the group is working on

Challenges
Briefly write what are the challenges you might face
